R

I have another customer having the same issue with a receiver and our selector

Yep I think the mold may be done. I look around and send some earlier ones

R

I'm going to have these guys send it back to you otherwise it will have to go back through a dealer for the replacements

You can't replace them?

Wednesday, March 14, 2018 · 11:27 AM

R

Please send one extra buttplate. Or I can take one off the lower I'm returning if that's alright

Ok

Monday, March 26, 2018 · 2:34 PM

R

Increase that order to 10 units please. I had more orders come in over the weekend

Monday, March 26, 2018 · 5:46 PM

Ok

Friday, March 30, 2018 · 2:20 PM

R

I'm sending you three selectors that I tested in both our Cav-15 receivers. Neither had trouble.

And worked fine. I will send seven extras. I cannot replicate the problem with a full tension spring and both arms installed

Great

Friday, March 30, 2018 · 8:57 PM

Not too late I leave to Dallas early tomorrow

Lol wrong person Russell on that last one

R

No worries

Tuesday, April 3, 2018 · 2:27 PM

R

Are those receivers on the way?

No the anodized is ate up. Hopefully Thurs

R

You should just have us make these for you and trade us receivers lol

Wednesday, April 11, 2018 · 10:17 AM

Saw the pics. Looks functional but I think you'll be fighting an up hill battle aesthetics wise. Particularly when it comes to the grip unless you have pannels that are supposed to be added

R

Need to get Karl under NDA so you can get his input too

Yes please send his email address

Did the new selectors still have issues? Haven't had any problems with the lowers I assembled here

No issues except his lower. I think his safety hole was over reamed

R

Monday, June 11, 2018 · 12:30 PM

R

More questions piling up on Facebook too

6/29/18

Yes I'm about to do an announcement

R

Armory-0197

Do you have another run of MKIIs scheduled?

Not at this time the current plan is shut down move to next gen and roll out big with several distributors. Which I will include you.

They the customers are not going to be happy... They are already got pitch forks out

But they will be happy when it finally comes together

R

I've noticed...I've told the Inrange patrons they should buy now if they want a MKII, change will be coming

R

Those units you sent me are all already sold

I think we have 29 black blems. 14 zombie green. 24 more coyote tan that require some milling in the trigger well. 12 more pink. And 24 more mixed colors.... Between color shots

R

Give me a deal on the ones requiring work and I'll deal with it here

Ok ill put something together this weekend

R

How many units total did you guys produce since you got it?

I think 6000 plus

I would have to go to the books to know for sure

Just curious

R

How many do you think you sold since the WWSD thing on Inrange?

3000 plus

And I have potential orders lined up go 9000 asap

I'm working a 500k investment that refurb and buys new machines Two new molds and full on marketing campaign it will pay back the investor 850,000 plus 8percent equity

R

That's pretty awesome. Let me know what I can do to help you roll it out.

Our new models will reduce secondary ops by 50 percent

I am also working on a retail box that is like Magpul for better retail reponse

R

Regarding your public statement I would include something along the lines of "We are thankful for InRange TV's WWSD project reinvigorating interest in the product and allowing us to sell all out our MKII product line. This year the CAV-15 MKII turns 15 years old and the mold is due for some serious maintenance and the product like has been in need of a feature update for some time The MKIV will incorporate a number of features we've wanted to add incorporate since acquiring the CAV-15 in 2012. Some of these were recommended by Russell Phagan aka SinistralRifleman.com who has been involved with the CAV-15 product line since 2001, others our engineers have included to improve manufacturing and meet the needs of the modern firearms market."

R

What are you anticipating the new weight to be?

Variance and distribute MKIII will be the same the MKIV will be a couple of ounces lighter

R

What are you calling the MKIII?

I like what you just suggested and will use that

Looks good what do you think

I think it's good

R

I'll have start lasering the lowers if you're good with it

Wednesday, July 25, 2018 · 8:17 PM

I think we need to move the power series down some

R

Independent of the logo?

Move the logo down with the power series to iliminater the gap and that will work

R

I'd suggest just droppi

Yes

R

Good to go?

Thursday, July 26, 2018 · 5:51 PM

I did he wanted to see how his meeting tomorrow goes with an investor... I'll follow up with him  
and let you know

Ok

R

Even if you get the new investor going 6 months off the market waiting for new mold would be pretty rough

Wednesday, September 5, 2018 · 9:36 PM
